APPLICATIONS:

- Beverage Labels
- Warning & Product Identification
- Freezer/Refrigerator Decals
- Wall, Floor & Window Decals
- Bumper Stickers

MARKETS:

- Manufacturing
- Personal Care & Beauty
- Food & Beverage
- Healthcare
- Retail

WHICH ADHESIVE IS RIGHT FOR YOU?

Low Tack Adhesive

A non-permanent adhesive with sustained low tack to flat and smooth surfaces. Provides clean removability, even after prolonged use.

Repositionable Adhesive

A versatile adhesive providing low initial tack that builds to medium adhesion over time, allowing for repositionability, removal and reapplication to smooth and semi-rough surfaces with clean removability. Excellent hybrid solution that perfectly balances the lasting performance of permanent adhesives with the ease of removal that low tack adhesives offer.

Permanent Adhesive

An adhesive with medium initial tack that builds to permanent adhesion quickly. Provides lasting performance on a variety of smooth surfaces, both indoor and outdoor, and across a wide temperature range. Also available for rough textured surfaces (see MGX-1041).
