

# Styrene (HIPS)

Our High Impact Polystyrene (HIPS) – or Styrene for short – features a beautifully smooth finish and conventional blue-white hue for unmatched printability. Compatible with HP Indigo, Konica Minolta KM-1 and select Production Dry Toner presses, our Styrene possesses excellent rigidity and impact strength, making it the ultimate selection for Point-of-Purchase displays and signage. Its ease of die cutting also makes it an economical core solution for thermally laminated cards and ID's.

## BENEFITS:

- Excellent Quality
- Affordable
- Impact Resistant
- Multiple Opacities
- Good Rigidity

## APPLICATIONS:

- Point-of-Purchase Signage
- Back-lit Displays
- Push/Pull Graphics
- Gift, Loyalty, & Library, & Fundraising Cards

## MARKETS:

- Hospitality
- Retail
- Entertainment
- Grocery
- Healthcare
- Travel

## Which opacity is right for you?

### TRANSLUCENT

Its low opacity diffuses light, making it perfect for backlit applications.

### DOUBLE / TRIPLE WHITE

Its moderate-to-near-dead opacity is well-suited for everyday printing and single-sided applications.

### DEAD OPAQUE / BLOCKOUT

Completely opaque and light-blocking for double-sided printing.

Scan or click for press compatibility guide.
